

BLACKDOWN GREENROOFS INSPECTION CHAMBER.

INSPECTION CHAMBER- EXTENSION COLLARS AND LOCKABLE LID.

The inspection chamber is used to protect and cover drainage outlets on a green or ballasted roof. It is installed over the outlet, and prevents the roof material (soil, leaves, sedum etc), from blocking up the outlet.

Manufactured from high-grade powder coated aluminium, the Blackdown Inspection chamber provides excellent corrosion resistance, and features a lockable lid for additional security.

Groves cut into the base ensure that water can run freely off the roof to the outlet.

Features include

1. Standard and chamfered bases are available – to fit against any roof edge.
2. Aluminium – Corrosion resistant, essential for green roofs.
3. Ample Drainage slots – free flow for rainwater.
4. Flexibility – Any depth of roofing build-up.
5. Simple assembly – quick to install.
6. Bespoke colour service – suit the look you need.
7. Safe access – prevent roof drain being blocked.

Description	Height (mm)	Dimensions of base (mm) w x l	Product Codes
Standard Base	50	300 x 300	BHC/DET/ICL
Parapet Base	100	300 x 300	BHC/DET/ICL-B-PARA
Interlocking section	50	300 x 300	BHC/DET/ICL-S50
Interlocking section	75	300 x 300	BHC/DET/ICL-S75
Interlocking section	100	300 x 300	BHC/DET/ICL-S100
Interlocking section	200	300 x 300	BHC/DET/ICL-S200
Locking cover & key	55	300 x 300	BHC/DET/ICL-LID
